Legal Disclaimer

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

Legal Disclaimer

Compliance with tax obligations:

Users of the Website/Whitepaper are entirely responsible for determining what, if any, taxes, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability:

FLC COIN shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). In particular, is one of the riskiest investing options.

There's a chance you'll lose your whole investment

Investment risks:

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

Legal Disclaimer

- As of the time of its creation, this whitepaper may only be disseminated for general reference in connection with this project, and it may be analyzed and amended at any time. At whatever juncture, the information in this document may be modified or amended.
- No one is obligated to enter into a contract or make a legally binding commitment in connection with the sale of FLC COIN, and no funds are to be transferred or received based on this whitepaper.
- This whitepaper should not be considered as a proposition by a FLC COIN issuer/distributor/company to sell or buy tokens, and the presentation or material should not be based on or rely on any contract or investment decisions.
- This whitepaper is not intended for use in business plans, prospectuses, proposals, or other similar documents, and should not be considered as investment proposals or offers in any jurisdiction, including securities, business trust units, or collective investment plans.

Legal Disclaimer

- To token purchasers, FLC COIN and platform should not be construed as an investment, income, payment, or benefit, or as an opportunity to obtain a piece of any sum specified.
- The regulatory agency has not reviewed, inspected, or approved the content in this white paper. These actions are outside the scope of any jurisdiction and will not be implemented in the future.
- Buyers of FLC COIN should not understand, interpret, classify, or treat them as follows:

A bond or stock issued by a non-virtual currency organization; authority, options, and derivatives over such bonds and shares; and a differential contract intended to fraudulently pretend to be a guarantee of an investment return, or to prevent loss and rights under other contracts. A collective investment plan or a company trust are examples of securities or derivatives units.

Executive Summary

FLC Coin will offer a complete ecosystem with features such as staking, the NFT Marketplace, and an exchange. Users will be able to earn yield in the form of FLC Coins by staking. With decentralized crypto exchanging, we're reinventing the market with a more open, accessible, and fair global financial system. FLC will create its own NFT marketplace and serve as a hub for the decentralized community.

BNB Blockchain appears to be a viable alternative to current existing platform. Projects on the

BNB Blockchain offer a fantastic chance for DeFi since they are similar to those on the BNB Blockchain but are faster, cheaper, and have more possibilities.

Developers may easily recreate code, projects, dApps, and concepts on the BNB Blockchain,

which has tremendous potential. In terms of block times and processing capabilities, the blockchain's Proof of Staked Authority is incredibly efficient. It saves a significant amount of energy and hardware resources

Introduction

Future life creation (FLC) is a fully compliant and regulatory friendly multi-asset platform that seeks to serve as a bridge between traditional finance (tradfi) and decentralized finance (defi) to facilitate defi participation by both institutional and individual retail investors. To achieve this objective, MF proactively collaborates with regulators globally to develop products and features that meet regulatory requirements. MF's focus on regulatory compliance and risk management underscores its commitment to establishing a sustainable and secure platform for all types of investors seeking to access the benefits of defi.

FLC is set to debut a number of yield-bearing defi products as its initial offering, followed by the launch of a central limit order book (clob) dex that will offer swap functionalities and tokenized trading of traditional financial products such as debt, equities and other real world assets (rwas). After these products are successfully launched, MF intends to augment its decentralized exchange (DEX) offerings by providing derivative products. Throughout this process, the FLC team will maintain its unwavering commitment to developing and enhancing its products within a trusted, compliant and self-custodial environment, in line with our overarching ethos.

Mission

Our mission is to take "FLC COIN to New Heights" by providing an innovative, user-friendly, one-stop-shop to make a decentralized ecosystem but also to research and make a more precise decision, using a decentralized blockchain platform to give the opportunity to learn and raise funds for their projects to manage and improve their financial security.

- Our goal is to make staking and digital assets as easy as possible for all.

In digital asset staking, reduce volatility and generate positive price pressure.

Operate as a community-focused and community-driven digital asset that is completely decentralized.

Our goal is to make a bridge between Defi and blockchain to provide a decentralized financial and learning ecosystem to everyone in the world.

Is to provide the best learning platform for coding of Dapp's.

Integrate to eCommerce platform for more exposure and build a use case.

Vision

FLC Blockchain's vision is to add programmability and interoperability to the platform. It will deliver tremendous benefits by being compatible with all existing smart contracts in order to embrace the existing popular community and advanced technology.

We foresee a world where people can receive whatever they need in one crypto ecosystem, and wealth-building strategies that were previously only available to only affluent people become available to everyone, restoring people's control over their financial systems. The FLC COIN network will build a breakthrough ecosystem to attract more people into digital assets, allowing them to earn money by staking, and fundraising for their projects while keeping their privacy, security, authority, and autonomy.

The FLC COIN digital asset should be anticipated to develop an ecosystem built on strong monetary regulations and a stable decentralized basis.

Why Choose Our Coin

Our world is changing together, we can change it for the better

➤ Transparency

The greatest characteristic stems from the fact blockchain's transaction ledger for public addresses is open

➤ Efficiency

Blockchain removes the need for middlemen in many processes for fields such as payments and real estate

Why Choose Our Coin

➤ Security

Blockchain is far more secure than other databases and storage devices because each new transaction is encrypted

➤ Traceability

Every record submitted to the blockchain technology is traceable. The flow of the data could be

Problems & Solutions

FLC acknowledges the numerous challenges confronting the cryptocurrency market and endeavors to leverage the lessons learned from the prior mistakes made by centralized and decentralized projects.

During our years of experience developing products in the DeFi space, the MF team has identified several critical gaps that persists within existing DeFi Platforms:

- **KYC / AML Risk** - Traditional DeFi platforms do not carry out KYC (know your customer) nor AML (anti-money laundering) checks on users and/or transactions on their platform. This may expose users to potential interactions with counterparties listed on OFAC and other sanction lists or that are politically exposed persons, whether directly or indirectly. As a result, institutional investors and organizations are unable or unwilling to engage in DeFi.
- **Lack of Effective Monitoring** - Traditional DeFi platforms lack products and services designed to monitor and detect suspicious activities by DeFi users.

Problems & Solutions

- Poor User Interface - Many DeFi platforms have UI / UX that are only designed for native crypto and DeFi users, and do not adequately serve new crypto investors or those looking to enter into the space.

These deficiencies have resulted in the DeFi space being perceived as a risky and intimidating trading ground by both institutions and individuals alike. In response to this issue, MF is determined to incorporate an additional layer of security into its ecosystem, and offer a secure platform that provides the same benefits as the KYC process of centralized exchanges, while still enabling full control of one's own assets through self-custody. We believe this will provide our users with a “best of both worlds” DeFi experience. By providing users with a secure and transparent environment, we aim to foster greater confidence in the DeFi space and help reduce the incidences of fraudulent activities. We have designed our platform to address and service a wider audience, with the ultimate goal of facilitating a more inclusive and accessible DeFi ecosystem, which empowers users with a greater sense of control over their financial future

Problems & Solutions

What it means to KYC on FLC platform

KYC onboarding will be used to identify and verify MF platform participants before allowing them to use our products and services. Our main goal at MF is to offer our DeFi services in a manner that helps prevent fraud, money laundering and other illegal activities. MF's compliance team will review and approve or disapprove user access to the platform, based on customer identification, risk assessment, verification and due diligence. This process allows us to determine whether the user's wallet is whitelisted to interact with MF's suite of products. There will also be ongoing monitoring on customers' activity to detect any suspicious activity or behavior that may indicate fraud or money laundering. While this step may take a limited amount of additional time at sign up, the benefits in safety and security that it offers to all of our customers and counterparties is more than worth the effort.

TOKENOMICS

FLC tokens are the basis of the internal economic system of Future Life Creation and are used to access premium services implemented on the platform and (in the near future) to automatically copy the trades of professional traders on the Future Life Creation Copy Trading Platform. They serve as a special unit of account and are used to pay platform fees.

FLC tokens are a universal cryptocurrency that acts as a medium of circulation in the internal ecosystem of Future Life Creation and at the same time can be freely exchanged for fiat money and other cryptocurrencies.

When building the Future Life Creation economic model, the team opted for a deflationary model, which helps reward early adopters.

TOKENOMICS

Future Life Creation - FLC Coin

The FLC token is an internal unit of value that the Future Life Creation platform created to manage its business model.

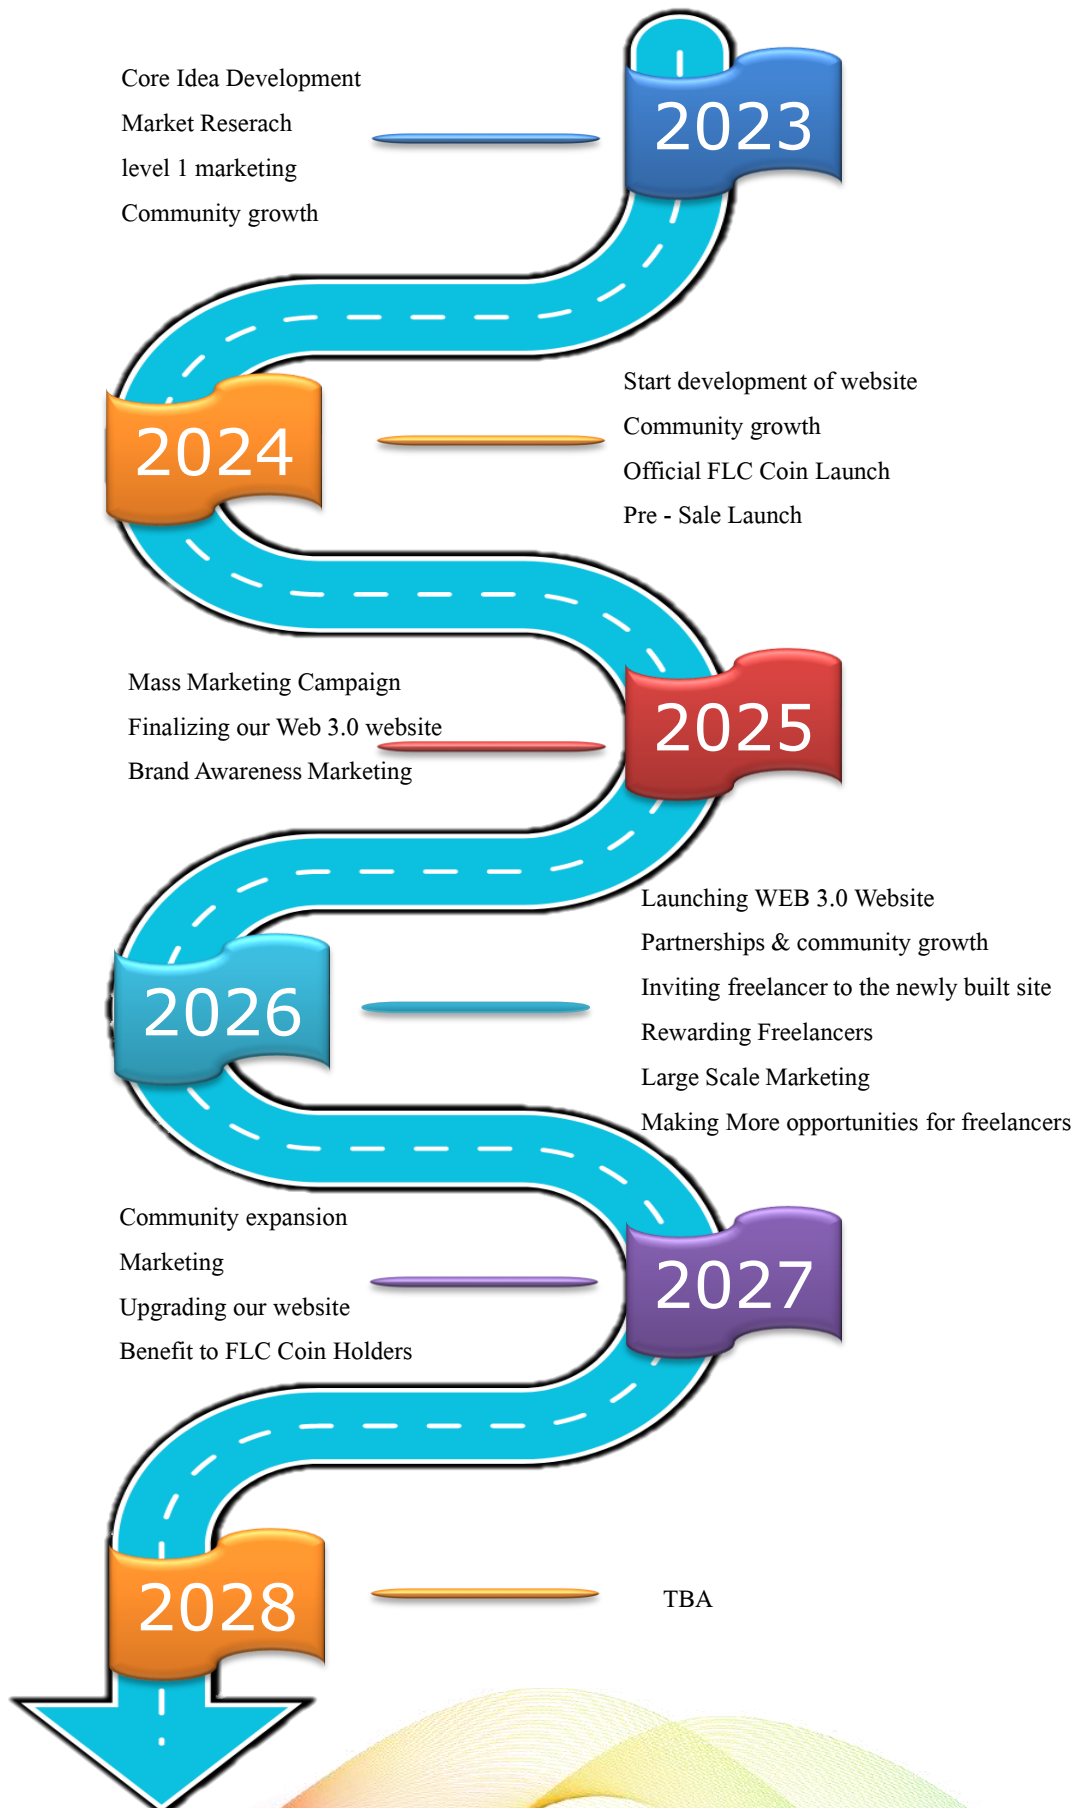

Token name : FLC Coin

Symbol : FLC

Decimals : 9

Total supply : 21000000

ROADMAP

Value Propositions

FLC value proposition lies in our ability to provide transparency, efficiency, and freedom from mishandling of funds by centralized players, while still maintaining regulatory oversight and a compliant platform. The key elements of our value proposition include:

Transparency: All transactions are visible on-chain;

- Efficiency & speed: We provide multi-chain interoperability to enable high speed and low cost transactions;
- Segregated accounts: Safeguarding client assets and money against any wrong use by a the non regulated platform.
- Regulatory focus: FLC works side by side with regulators internationally to make sure our products and services meet any applicable regulatory requirements and protect users and their assets.
- Compliant platform: On-chain KYC onboarding and ongoing on-chain AML monitoring of customer activities.

Future Life Creation Future Projects

- International Own Exchange Development
- International Own Blockchain Development
- Decentralised Wallet & EG SWAP
- Coin Staking Program
- Top Decentralised Exchange Listing
- Top Centralised Exchange Listing
- International Decentralised Exchange Development
- All Recharge options
- Gaming Sector
- E-Commerce
- Payment Solution
- Earn & Use NFTs
- Realstate Metaverse Land
- Education
- Health Sector
- Mining Firm
- International Multi Crypto Dashboard Card

Team & Background

The team responsible for the development and management of Future Life Creation (FLC) is a well-balanced mix of experienced professionals from diverse backgrounds, including seasoned veterans in the field of digital assets and cryptocurrency, banking and trading. By leveraging their collective expertise, the team aims to provide a comprehensive solution that draws upon the best practices from both Traditional Finance (TradFi) and Decentralised Finance (DeFi), to offer innovative and effective solutions for the platform's users.

The team's blend of skill sets and extensive knowledge of different financial products and services helps to ensure that Future Life Creation (FLC) can deliver a robust, user-friendly platform that provides a secure and efficient means of accessing the benefits of DeFi, while adhering to regulatory standards and maintaining best practices for risk management and compliance.

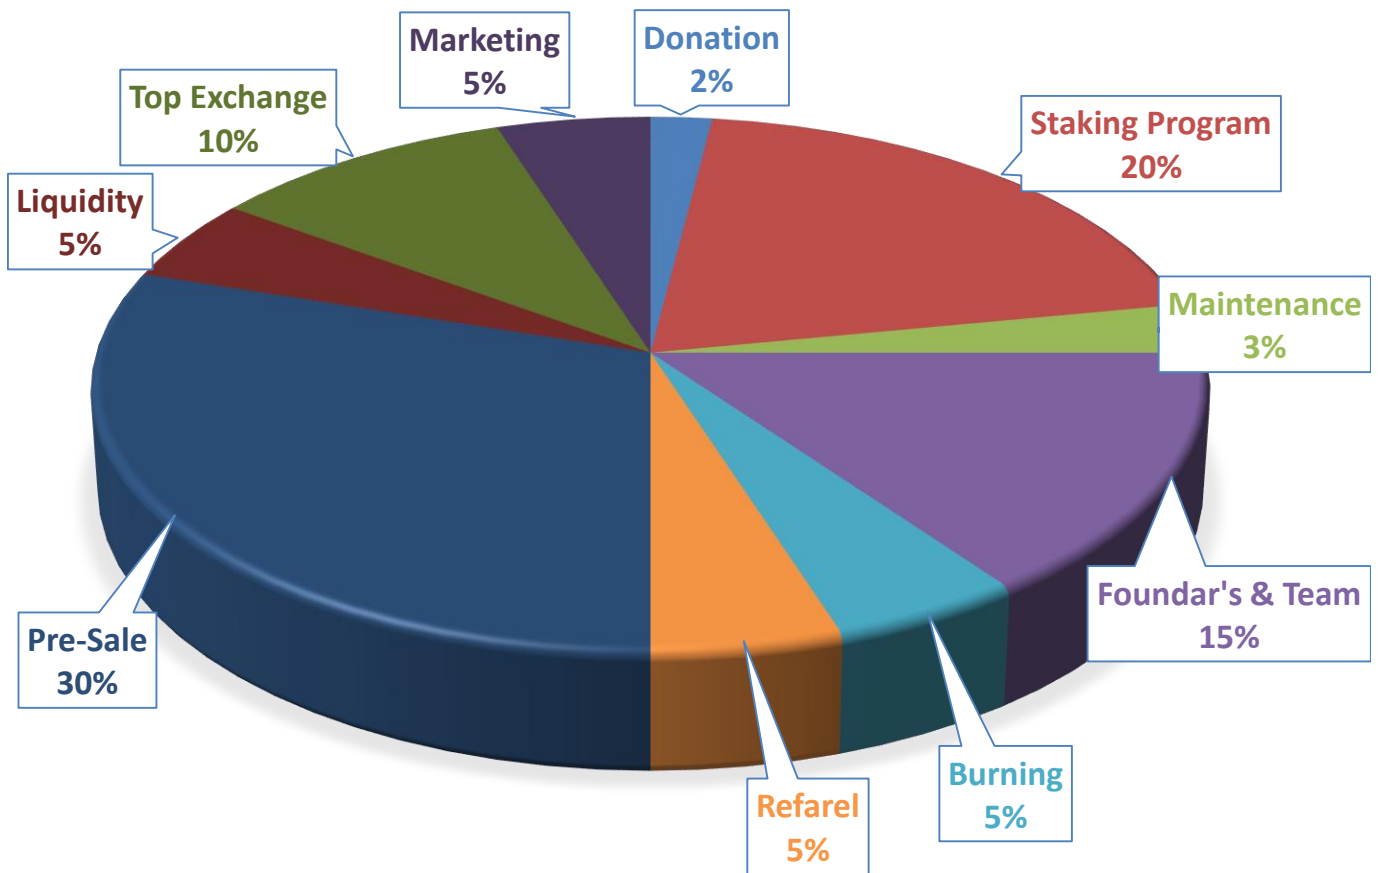

Coin Allocation & Funds Distribution
